

2015 Report

2015 report to VWF by Rob H.

Number of nests and fledged young mountain bluebirds and tree swallows estimated from nest evidence evaluated between August 23-25, 2015 found a total of 64 nest boxes.

Mountain Bluebird: 4 nests, 25 fledged, one nest had two clutches, Average 6.5 per box.

Tree Swallow: 53 nests, 298 fledged. Average 5.6 per box.

House Sparrow: nested in 1 box.

House Wren: disturbed 6 nest boxes. In most cases the wrens moved in late, after the swallows were finished nesting, but did displace 1 swallow family.

Many other birds, geese, rodents and a herd of mule deer also dwell, thrive, and stroll through this property. There is a blind on this site (bird watching station/hut). Please keep it clean and treat it with respect.
